## PROFILE

Final-year Computer Engineering student at ENIS focused on **multi-agent AI systems and LLM workflows**. Hands-on experience building agents that **plan, write, review and correct** their output with LangGraph, generating reports with a local LLM, and serving them behind REST APIs with Docker. Curious, rigorous, comfortable in English and French. Seeking a **4 to 6-month end-of-studies internship (PFE) in agentic AI**.

## TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java, SQL
- **AI & LLM Systems:** LangGraph, LangChain, LLMs (API and local with Ollama), RAG, GraphRAG, MCP, prompt engineering, LLM-as-Judge
- **Web & APIs:** React, Node.js, Angular, FastAPI, Flask, Spring Boot, REST APIs
- **Data & DevOps:** PostgreSQL, MongoDB, FAISS, Neo4j, Docker, Git, GitHub Actions, Linux
- **AI coding tools:** Claude Code, Cursor, GitHub Copilot, Codex, Google AI Studio

## PROFESSIONAL EXPERIENCE

**Full-Stack and AI Developer Intern** | GPRO Consulting | 2026 (2 months)

- Contributed to an **AI document-intelligence system** that classifies documents, extracts their data with OCR and validates it, integrated with an ERP through REST APIs.
- Built OCR pipelines with **confidence thresholds and human feedback**, and **monitoring dashboards** to follow the quality of the results.
- **Stack:** Spring Boot, Angular, Python, scikit-learn, Tesseract OCR

**Worker Intern** | Tunisie Telecom, Tunisia | 2025 (1 month)

- Observed telecommunications operations, technical departments and organizational processes.

## PROJECTS

**Multi-Agent Research and Graph-RAG Assistant**

- Built a **LangGraph multi-agent workflow** that plans its steps, retrieves with hybrid RAG, Neo4j Graph-RAG and Text-to-SQL, then **critiques and corrects** its own answers; documents are ingested with OCR and served by a FastAPI REST API.
- **Stack:** Python, LangGraph, FAISS, Neo4j, FastAPI, Tesseract OCR

**Multi-Agent Cyber Threat Intelligence System**

- Built a multi-agent system that correlates OSINT sources with a **local LLM (Ollama)** and **generates reports automatically**, with **critic and moderator agents** that review the output for bias; developed with Cursor.
- **Stack:** Python, Ollama, LangChain, LangGraph, FAISS, FastAPI

**TrustRAG: Trustworthy Agentic RAG Platform**

- Built a multi-agent **RAG and Text-to-SQL platform** that cites its sources and **verifies every answer against evidence**, served by a FastAPI REST API in Docker and validated by **85 automated tests**; developed with Claude Code.
- **Stack:** Python, FastAPI, LangGraph, FAISS, PostgreSQL, Docker

**Agentic MCP Server for Code Review and CI/CD**

- Built an **MCP server** that gives a **LangGraph agent** controlled access to GitHub repositories and CI/CD pipelines to review pull requests, with **human approval**, structured logging and GitHub Actions workflows.
- **Stack:** Python, MCP, LangGraph, GitHub Actions, Docker, Kubernetes

**Real-Time E-Commerce Platform (Full Stack)**

- Developed a full-stack platform with a **Spring Boot REST API**, an **Angular front end** and an HTML/CSS/JavaScript storefront, with **Apache Kafka** processing user events in real time and MongoDB Atlas for storage.
- **Stack:** Java 17, Spring Boot, Angular, Apache Kafka, MongoDB Atlas

## EDUCATION

**Engineering Degree in Computer Engineering** | National Engineering School of Sfax (ENIS) | 2024 to 2027 (expected)
**Preparatory Cycle in Mathematics & Physics** | IPEIM | 2022 to 2024
**Mathematics Baccalaureate** | Monastir Pioneer High School | 2022

## CERTIFICATIONS

- Introduction to RAG; Introduction to PySpark; ETL and ELT in Python; Introduction to Python; Git courses, DataCamp

## LEADERSHIP, LANGUAGES & SOFT SKILLS

- **Organizer:** PyFac 2025 & 2026 (company forum) | **Active member:** IEEE | **Member:** University Radio Club
- **Languages:** Arabic: native | French: B2 | English: B2
- **Soft skills:** curious, rigorous, autonomous, teamwork
